PISA-School of Clinical and Experimental Psychiatry  
*Institute for Improving Neuroscientific Knowledge*

The PISA-School of Experimental and Clinical Psychiatry (PISA-School of Psychiatry) was founded in November 2017 by a group of ex-students of the School of Specialization in Psychiatry at the University of Pisa. It wants to maintain over time that communion of clear and professional intent that the students have experienced during their specialisation course. The PISA-School of Psychiatry aims to be a meeting point for former students who want to continue to maintain close contact with each other and with the current and past teachers of the school. For this reason, they will organise refresher courses and specific congresses to maintain their continuing education in psychiatry at the highest level.

The PISA-School of Experimental and Clinical Psychiatry is a no-profit organisation that shall remain independent of political parties and any government. The objects of The Association are to promote, in the EU and elsewhere, the effective treatment of psychiatric patients, affective disorder and substance use disorder patients in particular, but without prejudice to the generality of the following:

- To promote at a national and international level the diffusion, the development and the progress of studies and research in the field of behavioural neurosciences, and the application of this neuroscientific knowledge to social aims;
- to promote the development and acceptance of treatment with psychiatric medications and other prescribed medications, including long-term prescribing and the utilisation of physical treatment
- to enhance the provision and quality of services to psychiatric patients and their families;
- to promote a better understanding of psychiatric treatment by the general public and its elected representatives and officials;
- to promote collaborative research and to provide a European research centre;
- to work with other Associations to promote support for psychiatric treatment world-wide;
- to promote goodwill and co-operation among the staff of psychiatric services and other medical treatment services in Europe and elsewhere,

so in pursuit of any of the preceding objects, to obtain financial support from government agencies, philanthropic organisations, corporations and any other sources, public or private.

Bacciardi Silvia, Del Carlo Alessandra, Maremmani Angelo Giovanni Icro, Maremmani Icro, Mata Hernandez Maria Belen, Pacini Matteo, Perugi Giulio, Quaranta Giuseppe, Romano Anna, Rovai Luca†, Ruffolo Giuseppe, Toni Cristina, Tusini Giuseppe, Vannucchi Giulia
